Hiring Manager
Toronto Transit Commission
1900 Yonge St
Toronto, ON M4S 1Z2

Dear Hiring Manager:

I'm writing in regards to the Senior Systems Analyst opening posted on the TTC company site. With a bachelors degree in Computer Engineering and extensive hands-on experience using .Net languages to create and implement software applications. I am confident I will be an asset to your organization.

As a highly self-motivated and detailed oriented individual who thoroughly enjoys problem solving and teamwork. I believe I would be an excellent fit for this position. Throughout the years I've spent as a developer I gained valuable experience and excellent proficiency as a developer and engineer. Working in a firm such as yours will aid in reinforcing and building on this knowledge. Additionally, I am very comfortable applying knowledge in a rapid and time-constrained manner as is often the case in corporate environment.

My curiosity has always motivated me to develop a fundamental understanding of new topics and bridge gaps in my understanding as frequently as I can. I find it exciting and a crucial aspect to understand all aspects of a system to diagnose and debug a technical issue. I approach new challenges with confidence and excitement in what I can learn, which enables me to pick up and apply new technologies, programming languages and principles as needed. I highly value a friendly, collaborative environment where one can both help other team members and learn from them and this is one of my favourite aspects of a collaborative environment.

Becoming a part of the Toronto Transit Commision is just the kind of opportunity I am looking for to challenge myself and apply my skills towards something I'm very passionate about. It would give me great pleasure to have the opportunity to discuss future employment and to personally speak with you. If you have any questions or require any additional details please do not hesitate to contact me

Sincerely yours,

Ruban Palani
